DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 8-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over USPN 6,562,698 to Manor in view of USPN 6,420,245 to Manor and in view of US20010034564A1 to Jones. Manor '698 describes (column 9, lines 16-32) dual laser cutting of wafers with a pair of in-line scribing and cutting laser beams. Manor '245 describes (e.g., Abstract) forming scribe lines with a laser and cutting through the scribe lines with a saw blade. Jones describes [0029] forming scribe lines with a cutting saw, dicing wheel, or laser beam. Dicing with in-line laser and saw blade would have been obvious at the time applicant's invention was made to a person having ordinary

skill in the art because the simultaneous scribing and cutting is well known, the laser scribe with following blade cutting is very well known, and the idea of having a choice of saw, wheel, or beam is well known. Arranging a scribe and saw in particular combination would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the combination scribe and cut speeds handling and reduces processing time. The particular dependent claim features would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because the particular laser, saw, speed, power, and refresh rates require routine analysis, choice, and experimentation with respect to a particular workpiece.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Matsuyama et al describe decreasing the number of steps in a manufacturing process. Hart and Smith et al describe laser, diamond scribe, or saw.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
